## Facebook Ads

I get penny clicks and penny engagement. Here is a screenshot of my most recent campaigns that I was running November 25, 2018 - November 27, 2018. I ran short campaigns to boost traffic to my offers I was promoting.

Annotations: Engagement (points to 180), CPC (points to \$0.04), Impressions (points to 11,744)

## Targeted Leads - Get penny and sub penny clicks...

I fired these ads up like before lunch. I can't make this sh\*t up man. Penny leads. Total cost is still less than 5 bux... and building a mailing list too.

121	\$0.01	117	\$0.01	—	9,611	1.01
459	\$0.004	142	\$0.01	—	2,072

**This has to be all Tier 2 and Tier 3 Countries?**

Not at all!

Below is my current targeted list of countries that I used in the above penny clicks and engagement example. If you exclude the bad countries you end up with yes, more than Tier 1, but you also end up with decent traffic for the low price you see above.

**Location:** Worldwide

**Exclude Location:**

Afghanistan, Bangladesh, China, Israel, India, Iraq, Japan, Kyrgyzstan, Cambodia, South Korea, Kazakhstan, Laos, Myanmar (Burma), Mongolia, Oman, Pakistan, Russia, Saudi Arabia, Thailand, Tajikistan, Turkmenistan, Turkey, Uzbekistan, Vietnam, Yemen, Africa

**Age:** 24-54

**Language:** English (UK) or English (US)

**People who match:** This will vary as this is the niche you are targeting!

More examples of other campaigns I did back a few months ago:

Oh... and yes, I build a list out of these ads. Mailing list so you can do the most important thing, and this is even old school band promo stuff - you have to email a lot of people, as ----  
**EVERYONE** is getting OFF of Facebook!

Great autoresponder would be [Aweber](#). Whatever you do, don't be tempted by free services like Mailchimp. Rock solid autoresponder with years of experience in email marketing!

You need one (autoresponder) if you want your fans in one place - email, remember - you want to get OFF Facebook or rely on it for 100% of your traffic to what is important to you. Shows you do, events, friends shows, etc...

Do list build by using the lead generation ads if you can.

In conclusion, while Facebook is a great free traffic resource, you are likely spending way too much time wasting time on Facebook. Maximize your time by spending more time off Facebook and still leveraging the contacts you need to market for free.

### **Solo Ads (Tier 1)**

Udimi is an option, but you likely will get a mix of traffic. It is however an option.

I recommend this guy - [Sign Up Here](#) - I have been buying solo ad traffic from this guy Cory and he is getting me 100% Tier-1 traffic for the past few campaigns. I have a whole bunch of Tier-1 subscribers now. Mostly USA, but Canada and Australia too.

Anyone want to trade traffic the right way?

## **Free Traffic**

What I recommend is the following - [5 Minute Lead Machine](#) - Click the Buy Button on that post. That is one of the most common methods of getting free traffic. It works and is used everyday by thousands of people you see online (on Facebook).

[Free Traffic Bible](#) My 100% Free 67 page curated eBook. This covers all the free traffic methods that are NOT Facebook.

[Emoji Traffic](#) is another free way of getting traffic on Facebook

There are tons of other methods to get free traffic to your site, your offer, etc. These are the most viable to date. One more I'd like to throw out there for you. It does work, and can really take off for your business if you give it a go.

Do not be skeptical or afraid buy at least the FE product: [0 to \\$100 In 24 Hours](#) - there are a ton of great bonuses that you'll get with that one. Info is on that link above when you click it.

OK, that is it. In case you want the OTO1 - the DFY .. you can get it here:
